

# The Art of Gait Analysis

Thursday, November 30, 2017

Instructor: Mark King, DC

For centuries, gait analysis has been used by many clinicians in the healthcare profession. Some pitfalls include the subjectivity of the analysis and confusion as to what is clinically pertinent. When done in a systematic manner, information can be gleaned from a patient's gait that will lead to treatment ideas and more specific functional tests. Perhaps clinicians have made this too difficult in the past, and lost sight of the big picture. Dr. King will break it down and make it something that you can easily incorporate into your practice. Covered information includes:

- Pertinent biomechanics of the lower extremity
- How these biomechanics apply to gait
- How to functionally and manually assess for pronation and supination with associated adjustments
- Adjusting and palpation considerations for the hip and pelvis
- Clinical functional screens
- When to use orthotics

Join us for a day of learning examination procedures and treatment techniques you can use Monday morning with your patients.

**Time:** 8:00 AM - 2:00 PM  
**Where:** Wingate by Wyndham Dayton-Fairborn  
 Fairborn, Ohio  
**CE Hours:** 6  
**Contact:** Nicole Ganim, [nicole@oscachiro.org](mailto:nicole@oscachiro.org)  
 or call 614-229-5290

**General Admission DCs / Staff:** \$139 / \$79  
**Standard Members / Staff:** \$79 / \$49  
**Member + Members and Staff:** Included with membership!

## 3 EASY WAYS TO REGISTER!

- 1) Online - [www.oscachiro.org](http://www.oscachiro.org)
- 2) Call 614-229-5290
- 3) Or, fill out the form:
